

● RAWBACK

SEED ROUND

You shoot. We handle the rest — with AI.

The photography platform for the AI era.

LEO · FOUNDER · SINGAPORE · RAWBACK.APP

THE PROBLEM

Camera photos have no home.

01

Stuck on SD cards

RAW files never leave the card, or die in folders nobody can search.

02

Cloud apps are for phones

Google Photos and iCloud barely tolerate RAW; EXIF and gear are invisible.

03

Editors aren't libraries

Lightroom edits photos. Nothing remembers where, who, or why.

WHY NOW

Three curves are crossing.

+11%

Cameras are growing again

9.44M shipped in 2025, second straight year of growth.

\$1.3B

Camera-to-cloud is mainstream

Adobe bought Frame.io; Canon, Nikon, Leica upload from the body.

10k+

Agents want personal data

Public MCP servers; Claude, ChatGPT and Gemini all speak it.

CIPA 2025 · Adobe · Anthropic, Dec 2025

RAWBACK · SEPTEMBER 2026

03

THE MODEL

Three layers, one library.

03

AI

Videos from photos · tagging · re-editing · long-term memory of your work

02

Image intelligence

Auto rate · auto group · auto dream recaps · people · places

01

Unlimited storage

Originals kept forever on object storage. 2 TB today; the architecture has no ceiling.

FOUNDATION

Storage is cheap and ours to scale.

MIDDLE

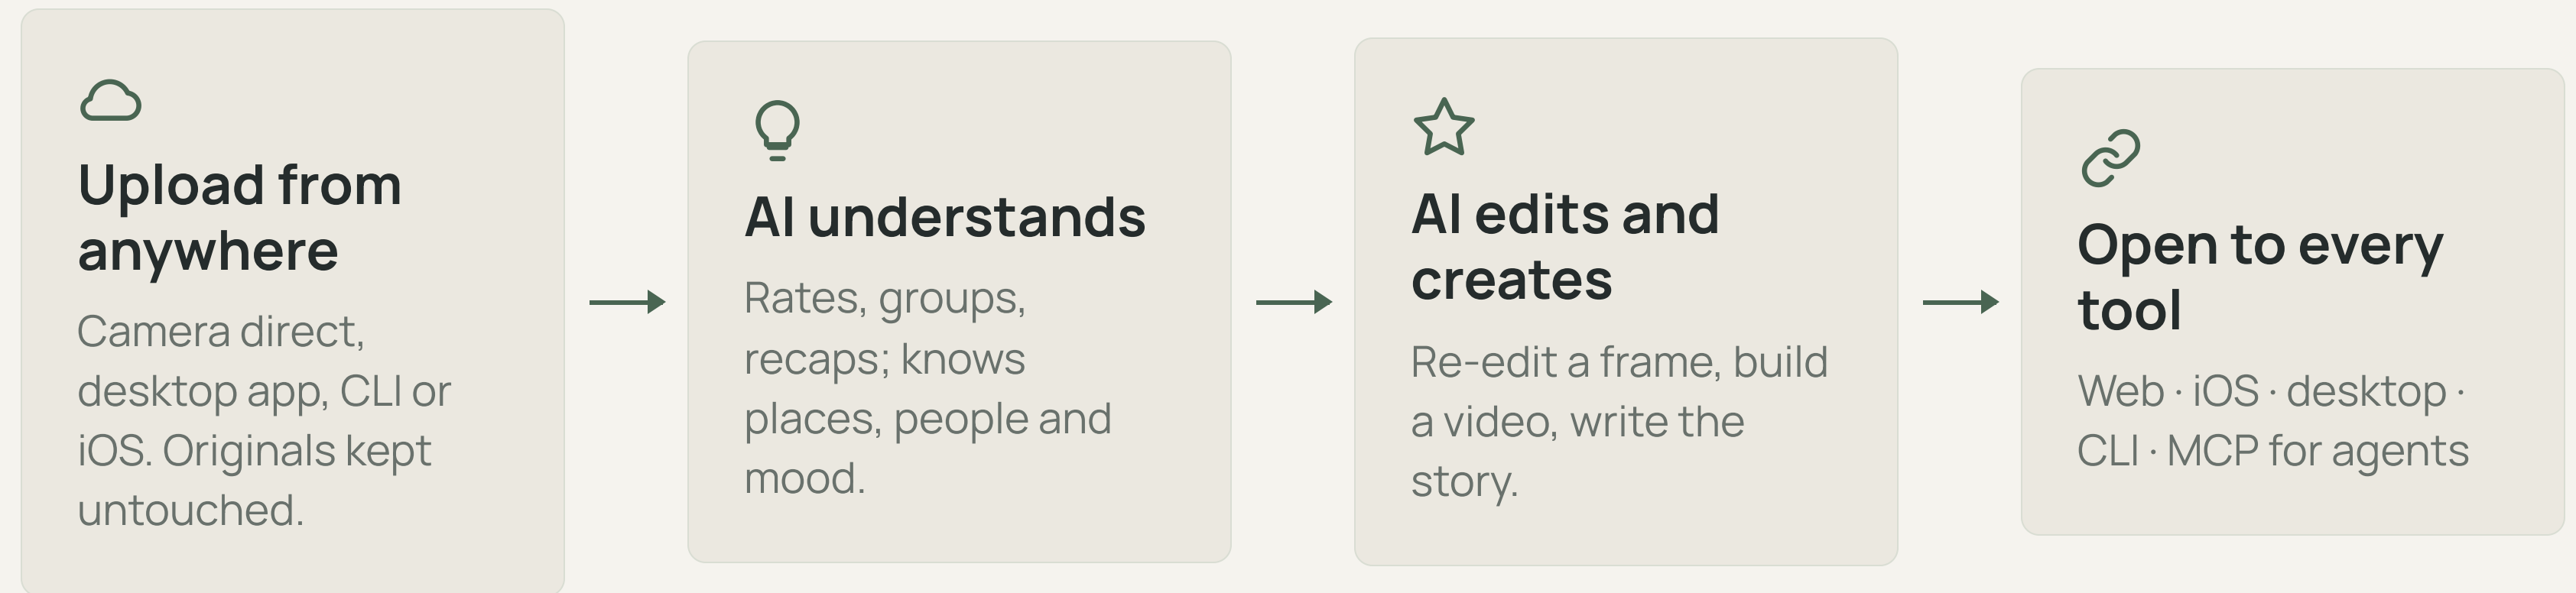

Understanding every frame, automatically.

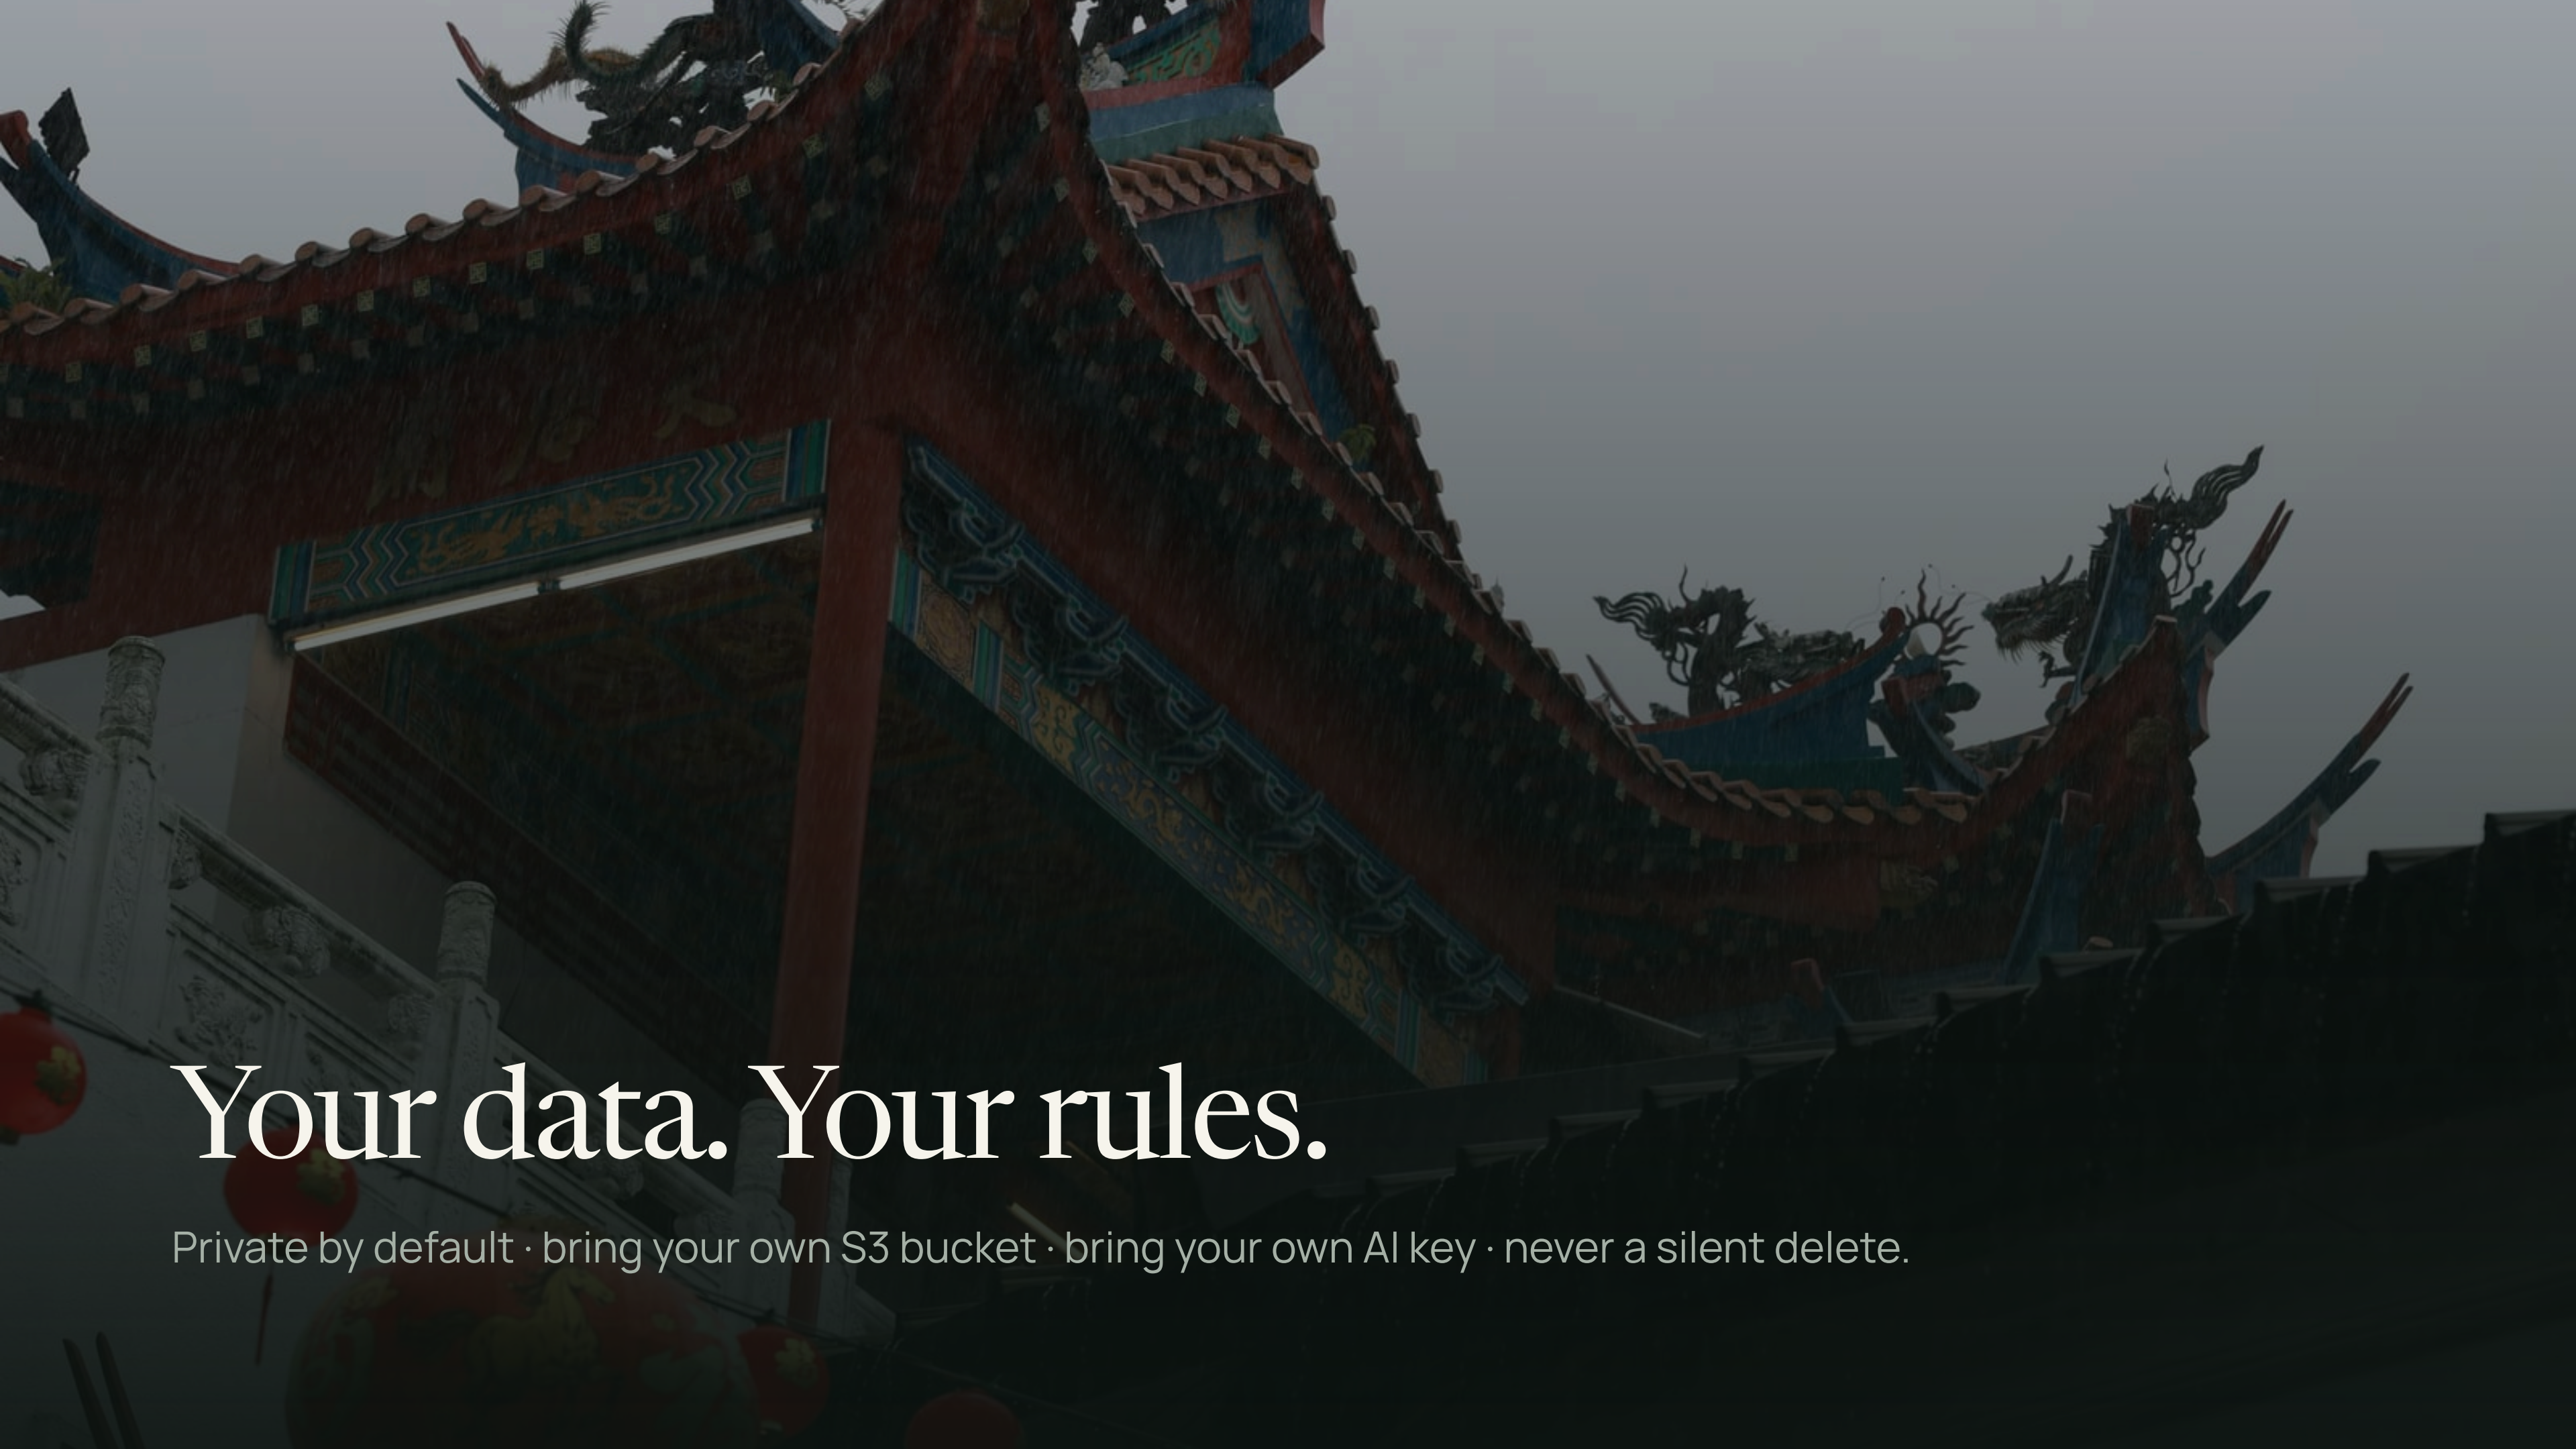

TOP

AI that creates, remembers and answers.

THE PRODUCT

Upload. Understand. Create. Connect.

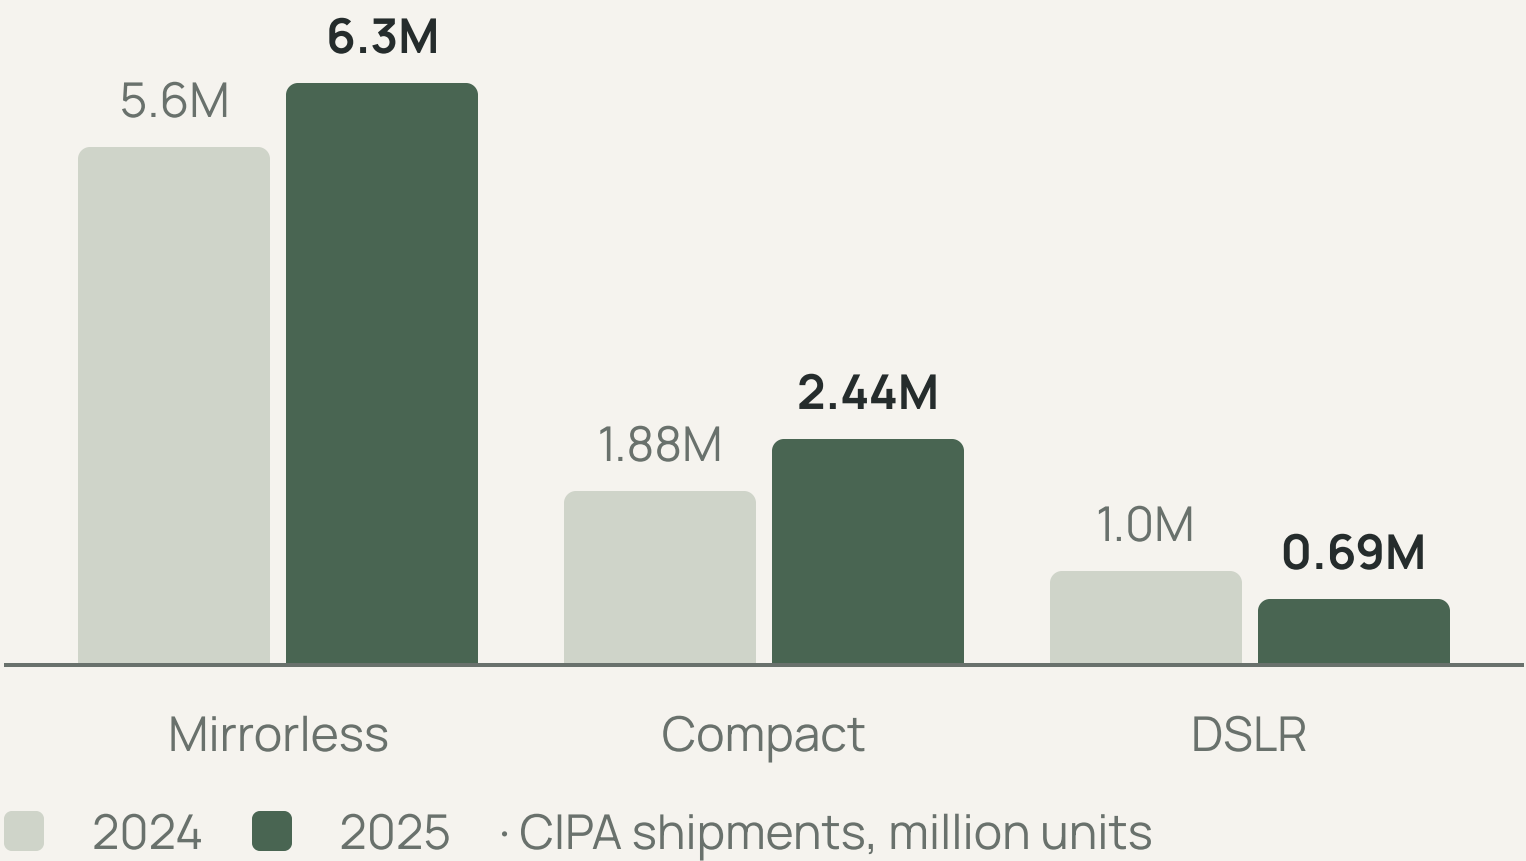

Your data. Your rules.

Private by default · bring your own S3 bucket · bring your own AI key · never a silent delete.

MARKET

The camera is back – without a library.

\$3.6B

photo management software, 2024 → \$6.3B by 2032

11.9M

mirrorless bodies shipped in 2024–25

1.5B

Google Photos monthly users

COMPETITION

Nobody serves the camera owner end to end.

	Rawback	Lightroom	Google Photos	Immich / Ente
Camera-direct upload	Yes	Via Frame.io	No	No
RAW originals kept	Yes	Yes	Limited	Yes
Auto rate, group, recap	Yes	Partial	Memories	Basic
AI video, edit, memory	Yes	Edit only	Edit only	No
Agent access (MCP)	Yes	No	No	No
Own your storage	Yes	No	No	Self-host

Lightroom 1 TB \$11.99–19.99/mo · Google One 2 TB \$9.99/mo · Immich ~108k GitHub stars

BUSINESS MODEL

Freemium plans, metered AI.

FREE \$0 5 GB · 200 credits	LITE \$4.99 200 GB · 1,500 credits	PRO \$14.99 600 GB · 5,000 credits	MAX \$44.99 2 TB · 20,000 credits
--	---	---	--

Add-ons

Storage, AI credits, face packs

China

Alipay / WeChat passes from ¥35/mo

Enterprise · later

Dedicated storage and AI support for studios and teams

WHERE WE ARE

The product is finished. Next: distribution.

Live

web, iOS, desktop, CLI, MCP

free signups to date

0

paying users — nothing sold yet

✓ Upload from camera, desktop, CLI and iOS

✓ AI editing, stories and agent access

✓ Five languages, China-ready

✓ Auto rate, group and dream recaps

✓ Payments live: Stripe, Apple Pay, Alipay, WeChat Pay

ROADMAP

Twelve months.

Q4 2026

Distribute

- App Store launch
- MCP directory listing
- Nikon / Sony / Fuji guides

Q1 2027

Capture

- Auto-geotag from iOS
- Wireless camera control
- Lightroom sync

Q2 2027

Create

- Photo-to-video
- Family & studio plans
- Shared libraries

Q3 2027

Enterprise

- Dedicated storage
- Private AI support
- Self-hosted edition

THE ASK

The build is done. This round buys growth.

[\$__]

seed · 18 months runway · most of it goes to marketing

Marketing & growth	60%
Product & engineering	25%
Infra & AI	15%

MILESTONES

- ☆ [__] paying photographers in 12 months
- ☆ App Store + MCP directory live
- ☆ Three camera-brand paths
- ☆ Enterprise pilot signed

Make room for your next
shot.
